DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wollersheim (5261214, cited by Applicant) and/or Rush et al (US 2003/084655 A1) and/or Stalpes et al (6082083), in view of Hildebrandt (5511445) and/or Moseley (6065764).

Wollersheim discloses a working member / blade (16), a handle / handlebar (22), a biased control / control bail / bale (30) which pivots from a first to a second positions to stop the blade.

Prior art does not discloses the flexible material claimed.

Rush similarly discloses a working member / blade (¶ 25), a handle bar (22), a biased control / bail / bale (32) for controlling the operation of the mower.

Prior art does not discloses the flexible material claimed.

Stalpes discloses a mower having a blade (8), a handle bar grip (32), a biased control / bail / bale (72) for controlling the operation of the mower, a

A-LI-1. 2074

Art Unit: 3671

channel to receive the control bail (fig 6). Prior art does not discloses the flexible material claimed.

Hildebrandt discloses flexible band grip that can be wound around a handle of a lawn mower handle / bar / control bail etc... to form a compressible deformable flexible hand grip / tube having a compressible outer surface / an overlap portion (fig 1) that is relatively comfortable for the person's hand and is made of a flexible foam material (col. 1, col. 2).

Malloy also discloses foam or rubber handle bar grip (15) of lawn mower application (col. 4, ln 39).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the handle bar or control control bail of Wollersheim and/or Rush and/or Stalpes with the teachings of a compressible tube foam grip material of Malloy and/or Hildebrandt, in order to make it less difficult to grasp the handle or control bail and avoid hand slipping (Hildebrandt, col. 1, In 15-25).

As applied to claim(s) 25-44, in view of the structure disclosed/taught by Wollersheim and/or Rush and/or Stalpes as modified by Malloy and/or Hildebrandt, the method of operating/using the device would have been obvious since it is the normal and logical manner in which the device is used.

Art Unit: 3671

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Farris, Turk et al., Moseley.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Árpád Fábián Kovács whose telephone number is 571 272 6990. The examiner can normally be reached on Mo-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas B. Will can be reached on 571 272 6998. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
